Methodology

The Baldwin Wallace University Ohio Pulse Poll of 1,068 likely voters was conducted between 10/20/2022 and 10/23/2022. SurveyUSA administered the survey instrument online to a representative cross section of self-identified registered voters in Ohio who were selected at random by Lucid Holdings LLC of New Orleans. Respondents were weighted to US Census targets for gender, age, race, education, and homeownership.

The overall margin of error for the survey was ± 3.5 percentage points. This margin of error was computed using an adjustment of the classical Central Limit Theorem margin of error associated with random samples. Specifically, the margin of error (computed at a 95% confidence level) was inflated relative to the ordinary calculation by a factor of $\sqrt{1 + [cv(\text{weights})]^2}$, where cv denotes the coefficient of variation. In this survey, the design factor was 1.17.

This margin of error assumes that the weighted estimates are approximately unbiased. This assumption implicitly relies on the assertion that any differences between the survey sample and the target populations on

Survey Responses

Q1: What is your opinion of Joe Biden?

Q16: Ohio voters will also vote on two ballot measures this November. Issue 1 would require Ohio courts, when setting bail for a defendant, to consider public safety, including the seriousness of the offense, the person's criminal record, and how likely they are to return to court. It would also remove the requirement that bail procedures be determined by the Supreme Court of Ohio. On Issue 1, how do you intend to vote?

Response	Overall	Gender		Age		Degree?*	
		M	F	18-49	50+	Y	N
Definitely Yes	65.1	69.0	61.2	64.4	65.6	66.5	66.4
